TAKE THE OUANTUM LEAP

TAKE THE LEAP

Quantum uses state-of-the-art ceramic crystal technology: a prime focus of the science world today; Containing the power to sterilise sewage into potable water without the use of chemicals. One of the many benefits of the Quantum is the signicant reduction of residual chemicals, such as chlorine or bromine.

Built to be installed easily and retrospectively into your existing set-

up, the Quantum is completely safe and signicantly more powerful than chlorine, hydrogen peroxide, UV and ozone. Photocatalytic Oxidisation has an immensely powerful effect with the ability to instantaneously destroy viruses, bacteria and pathogens, in addition to possessing the ability to convert sun tan oil, urea and other contaminants back in to their harmless molecular form.

Inniovatively designed, Elecro Engineering have developed the first cost-effective, photocatalytic oxidiser specically for the swimming pool industy, for a toxin free swimming Experience. Not only does it eliminate undesirable sideeffects such as sore eyes, itchy dry skin, discoloured hair and strong odours, it also prevents chlorine/ozone associated health conditions for bathers and swimming pool attendants.

PRODUCT OVERVIEW

Effective:

The only technology available with the ability to instantly destroy all viruses, bacteria and pathogens, and like no other device will break down oil and contaminants

Efficiant

consumes no more electricity than a common light bulb, providing continuous savings.

Powerful

The sterilising effect of the Quantum photocatalytic oxidiser (PCO) exceds the effects of boiling water.

Easy To Use:

Comes pre-assembled with all necessary sensors and control components: no complicated parts to piece together. Average lamp life expectancy: 4 years.

Clean:

Makes the water sparkle like diamonds in a way never seen before.

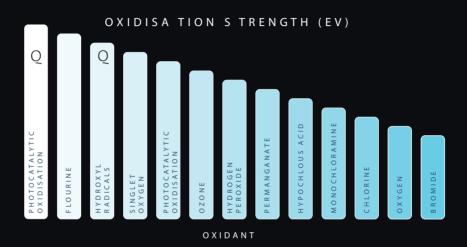

Safe

Keeping your family safe from chlorine UV & Ozone resitant microorganisms.

BUILT TO LAST A LIFETIME:

Corrosion resistant, regardless of any salt or chemical concentrations in the water. As the reaction surface is truely catalytic and therfore it is never consumed or altered.

WHY QUANTUM?

With a wide range of products available on the market that offer a variety of technologies to sanitise swimming pool water, how do you decide what method is best for you?

The table below identifies some key players including chlorine, ozone, hydroxyl radicals, and photocatalytic oxidisation at the top, as the strongest and most effective sterilization agents in existence

Sterilising siwmming pools has always been a matter of finding a balance between using chemicals strong enough to destroy the most harmful germs that may cultivate in the pool, whilst at the same time limiting the negative impact of the treatment method on bathers.

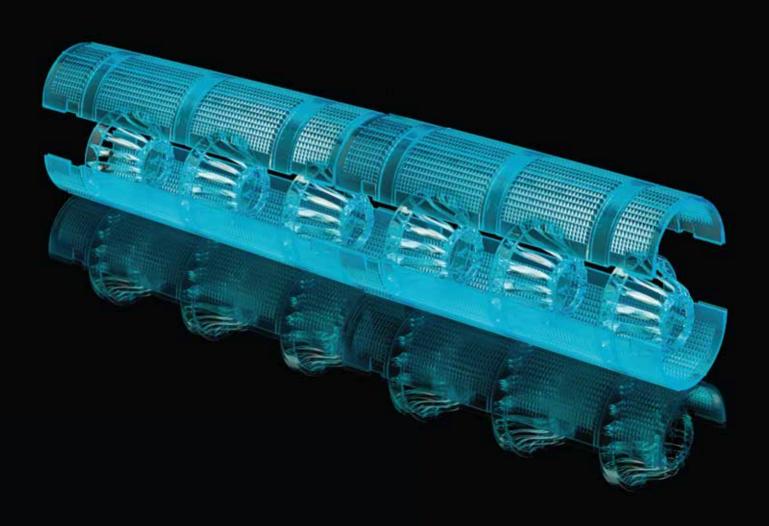

Currently, chlorine is the most widely used sterilisation method. The side effects though can be irritation to the skin and eyes, and the inconvenience of continually topping up the dosage, chlorine and ozone are also

known to release gas that hovers above the swimming pool surface which can be hazzardous to breathing In contrast the photocatalytic oxidisation reaction is contained within the reaction chamber releasing only pure, fresh water, clean enough to drink.

Quantum's advanced cleaning technology replicates nature's own technique for sterilising our planet, making it habitable. A photocatalytic oxidier, known by scientists as "Nature's Silver Bullet," neutralises what chlorine, Ozone and conventional UV sterilizers cannot and achieves exponential reductions in unwanted

bacteria, pathogens and viruses. Chlorine, ozone and UV are ineffective against Naegleria Fowleri and Adenovirusm whereas photocatalytic oxidisation has proved that nothing escapes it.

Built for ease of use - simply set and relax.

HOW DOES IT WORK?

Reaction 1: Quantum Photocatalytic Oxidiser (PCO)

Quantum works in a simlar way to a cars exhaust system, where a catalyst uses the combination of heat and Platinum coated baffes to convert the poisonus gases coming from the engine into carbon dioxide and water

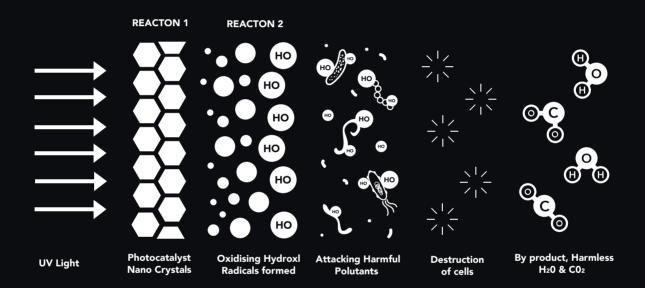

Quantum uses light as fuel to energise its sophisticated catalyst array, with rare elements including Anatase, Molybdenum and Plantinum ceramic catalyst, the resulting reaction that takes place inside the qunatum has not only the power to consume any oils or organics present in the water, it also posesses the power to abundantly and momentarily split the water molecules into what are called Hydroxyl Radicals. The combination of effects equip quantum with far more power to purify water than a chemical oxidising agent, such as chlorine or bromine.

Reaction 2: Hydroxyl Radicals (HO)

Hydroxyl Radicals are essentially a water moelcule with a hydrogen atom removed, and a highly reactive, unpaired electron, caused by the PCO reaction, disturbing the electrons and forming holes in the valance brand of the atom.

The exceptionally mobile molecules that the reaction chamber are highly volatile and able to destroy everything in their path. Once the Hydroxyl Radical has reacted with the pollutanit converts itself back into water.

It's true that Hydroxyl Radicals can be made in many ways, how ever instead of using more chemicals that are damaging to health, the Quantum utilises photocatalytic oxidisation. This is the safest and most effective method against polluntants.

INTELLIGENT FEATURES DOSING PUMP OPTION

The Quantum, uses the following features so you can set and relax:

Featuring:

- Flow Switch: The dosing will only be started when there is a consistent water flow being delivered to the unit.
- Digital lamp life countdown timer and LED Indicator.

INSTALLATION & SIZE GUIDE

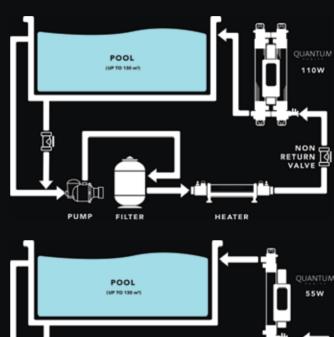

The Quantum can be easily installed into your new or existing pool system. Compared to other products in the market, Quantum offers superior performance at reduced levels of power consumption.

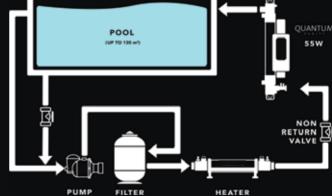

- Single tube (55w input) for up to 65,000 litres of swimming pool water
- Double tube (110w input) for up to 130m volume of swimming pool.

Installation is quick and easy using the pre-assembled threaded unions.

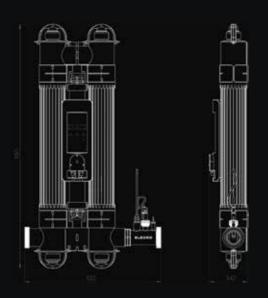

The Quantum is integrated with all controls and flow switch, along with the option of peristaltic pump and temperature probe guaranteeing accurate dosing.

Ensuring the pool owner peace of mind that they are choosing a natural, effective sanitiser that once installed requires no further maintenance.

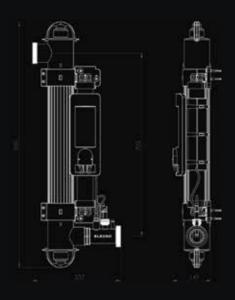

DIMENSIONS (MM)

130m

MODEL OPTIONS

Q - 130

All Quantum units are supplied complete with lamp life countdown with intelligent dosing pump.

Product Lamp Max Pool Code Output Volume Q - 65 55W 65m

110W

I ow sensor and either an analogue lamp life indicator and reset switch, or digital

Features

Analogue Lamp Life Indictaor & Reset Switch
Analogue Lamp Life Indicator & Reset Switch

Digital lamp life countdown with intelligent dosing pump

Digital lamp life countdown with intelligent dosing pump

TECHNICAL SPECIFICATION

Voltage and frequency	220v - 240v 50/60Hz or 110v - 120v 50/60Hz
Maximum operating pressure	3 bar
Lamp	Low Pressure / High output
Minimum low rate	4,000 litre per hour (4m³/h)
Maximum pool size	Single Tube: 65,000 litres (65m3) Double Tube 130,000 litres (130m3)
Water connections	2" / 63mm stepped + reducers 1½" 50mm
Salt Water	100% sea water safe
Oxidisation processes	Quantum photocatalytic oxidiser (PCO) & hydroxyl radicals (OH)
